

Case Study

HOW PRE RACK IT HELPED A HEALTHCARE COMPANY IMPROVE IT'S DATA MANAGEMENT WITH DELL POWERVAULT

INTRODUCTION

A leading healthcare company that provides a wide range of medical services, including hospital care, outpatient clinics, and specialized treatments. As a result of their commitment to delivering high-quality patient care, the volume of data generated and processed by the organization grew exponentially over the years. However, the company faced data management challenges, including data growth, storage inefficiencies, and data security concerns. To address these issues and enhance their data management capabilities, the healthcare company decided to partner with Pre Rack IT and implement a Dell PowerVault solution.

PROBLEM

Prior to implementing PowerVault, the healthcare company struggled with managing the vast amounts of healthcare data generated daily. Their existing storage infrastructure comprised various storage systems from different vendors, leading to storage silos and complicated data retrieval processes. Additionally, the existing storage solutions were unable to cope with the increasing data demands, leading to performance bottlenecks and reduced efficiency in data access.

SOLUTION

To improve data management, the healthcare company collaborated with Pre Rack IT to deploy the Dell PowerVault storage solution. The chosen Dell PowerVault model was tailored to meet the specific needs of the healthcare industry and included features such as high-capacity drives, data encryption, and secure access controls.

Client Challenges

- Managing vast amounts of healthcare data
- Storage inefficiencies
- Data Security

Pre Rack IT Solutions

- Implemented Dell PowerVault solution
- Tailored configuration to meet needs of the company (higher capacity, data encryption, and more security)
- Cost savings

Pre Rack IT is an IT hardware company that specializes in providing high-quality pre-owned IT equipment to businesses of all sizes. We offer a wide range of pre-owned IT hardware products from industry-leading brands, including servers, storage devices, and networking equipment.

We are committed to providing high-quality pre-owned IT hardware products and value-added services to our customers. We strive to build long-term relationships with our customers by providing exceptional customer service and delivering on our promises.
